Summary

Results-driven Senior Software Engineer and PMP-certified technologist with 10 years of experience leading the delivery of scalable web products from concept to launch. Known for driving cross-functional teams of up to 20 engineers while maintaining high standards for quality and on-time execution. Successfully scaled a front-end platform from 1 to 10 products in under a year, consistently shipping at million-user scale. Brings a strong track record of performance improvements, reusable system design, and AI-assisted planning — reducing rework and accelerating timelines across complex, multi-team projects.

Core Competencies

- High-performance web delivery (Lighthouse >90, Core Web Vitals optimization)
- Shared/reusable codebase architecture (scaled 1 → 10 products in 12 months)
- AI-assisted planning, estimation, and resource-based release planning
- Technical leadership & mentoring (teams up to ~20)
- System architecture & reusable design patterns
- Engineering standards, code review quality & DX tooling
- Agile execution, sprint planning & delivery coordination
- Stakeholder alignment & cross-team communication

Technical Skills

Languages / Runtime: TypeScript, JavaScript, Node.js, PHP

AI: Claude, OpenAI, Cursor, OpenSpec, Superpowers, SpecKit

Front-end: Vue.js (2/3), React.js, Next.js, Nuxt.js, jQuery, HTML, SCSS, CSS

Back-end: Express.js, PHP, Nest.js

Desktop: Electron, Tauri

Database: MongoDB, MySQL, SQLite,

UI Frameworks: Ant Design, Element Plus, Kendo UI, Bootstrap, Tailwind CSS

Build Tools: Vite, Webpack, Rollup

Testing: Jest, Vitest

Quality: ESLint, Prettier, SonarQube, HTMLHint, Stylint

Automation: Puppeteer, Playwright

Auth & Security: OAuth, OAuth 2.0, SSO

Version Control: GitLab, Bitbucket

Other: Responsive web design, Figma, Selenium, i18next, styled-components

Professional Experience

Project Manager— Lazarus Tech

2024 – Present · Team: ~30

- Scaled a chain of market website products from 1 to 10 live products in under 12 months by architecting a shared front-end codebase (Next.js/Nuxt.js) with reusable component libraries and standardized design patterns.
- Drove front-end performance initiatives achieving Lighthouse scores >90 on both desktop and mobile, improving Core Web Vitals (LCP, CLS, FID) under high-traffic conditions serving millions of users.
- Delivered on-time releases across consecutive quarters by introducing structured sprint planning, blocker tracking, and engineering workflows — zero missed customer-facing deadlines.
- Coordinated engineering, product, and operational stakeholders across front-end (Next.js/Nuxt.js) and back-end (PHP) modules; managed delivery risks and dependencies to ensure predictable releases.

Technical Team Leader — Ztech Solutions

2022 – 2024

- Architected reusable front-end structures and design patterns across multiple products, enabling faster onboarding and reducing per-project setup time significantly.
- Defined and enforced Git workflow, coding conventions, and code review standards — improving consistency and engineering quality across a multi-team environment.
- Ensured technical health through systematic code review and engineering standards, reducing regression bugs and improving maintainability.
- Coordinated cross-team delivery to align front-end and back-end work against performance, quality, and release milestones.

Front-end Team Leader — Hodfords Vietnam

2021 – 2022 · Team: ~15

- Owned front-end system architecture and reduced technical debt by standardizing implementation patterns across the codebase.
- Supervised system modifications and ensured engineering quality through structured reviews and mentoring.
- Managed Agile execution to support prioritization, planning, and delivery coordination.
- Hired, supervised, and mentored team members to improve delivery quality and team effectiveness.

Software Engineer — Enclave Software Development Centers

2015 – 2021

- Developed and maintained production modules with focus on correctness, performance, and maintainability.
- Monitored system performance and supported investigation and troubleshooting with the engineering team.
- Collected client requirements and translated them into engineering deliverables; received Outstanding Performance Award (2018).

Selected Projects

AI Planning Project

Next.js, AI-assisted planning, Jira release analysis, AI estimation, resource planning · Project Manager

- Built an AI-powered planning system that scans Jira project releases and estimates delivery timelines based on configured team resources.
- Generated detailed release plans including milestones, start dates, end dates, Gantt charts, and resource allocation.
- Improved release visibility and planning accuracy by combining Jira data, AI estimation, and configurable delivery capacity.

Chain of Websites (Million-User Platform)

Next.js, Nuxt.js, PHP · Project Manager · Team: ~30

- Scaled platform from 1 to 10 live products in under 12 months with a shared front-end architecture.
- Achieved Lighthouse scores >90 on desktop and mobile through systematic performance optimization.
- Delivered continuous releases under high traffic for a platform serving millions of users.

Diginex ESG Platform

TypeScript, Vue.js/Vue 3, Webpack, Vite, Micro-services · Front-end Team Leader · Team: 15

- Built and delivered the Diginex ESG ecosystem: reporting, materiality prioritization, progress tracking, and climate workflows.

Supply Chains Tracing Project

TypeScript, Vue.js, Webpack · Front-end Team Leader · Team: 20

- Led delivery for a platform supporting downstream tracing of goods related to child labor and forced labor compliance.

QNet Reporting System (Ford Motor Company)

TypeScript, React.js / jQuery, ASP.NET · Front-end TL & Software Engineer · Team: 12

- Delivered and evolved enterprise reporting workflows (designer, reader, data provider) in partnership with Ford Motor Company.

ZMining Ecosystem

Electron, TypeScript, Webpack, Vite, Micro-services · Front-end Team Leader · Team: 20

- Led front-end structure and delivery for automation workflows across desktop and browser environments.

Education

Management Information Systems — Duy Tan University, Da Nang, Vietnam

2011 – 2015

Certifications & Awards

PMP (Project Management Professional) — PMI (2025)

Outstanding Performance Award — Enclave Software Development Centers (2018)

Languages

Vietnamese — Native / bilingual proficiency

English — Professional working proficiency
